

Extraction Elements

This file is the master question bank for later PDF-by-PDF extraction. Each row is an atomic spreadsheet-friendly element. Unless a project-specific spreadsheet says otherwise, use these status codes in cells: **ND** for not discussed, **DU** for discussed but unclear, and **OCR_NEEDED** when the PDF text cannot be reliably read. For every non-**ND** answer, record page number, section heading, and a short quote in evidence fields if available.
